STEMHACKS

Sponsor Information

Programmers today, leaders tomorrow.

STEMHacks is one of the first ever high school Hackathons. Created for hackers by hackers. Inviting some of the most creative minds and innovative, high schoolers to STEM Academy in Downingtown, Pennsylvania to show off their skills and hack the web, mobile and hardware in a 24-hour competition.

Why sponsor?

Hackathons act as a major platform for some of the most brilliant minds to show off their skills, giving you access to the next generation's top talent. Although students are free to create their own hacks, sponsors who take advantage of this opportunity have the ability to influence students to use their products through branded prizes, API demos, swag, and tech keynotes.

As a sponsor, you will be able to demo your products to over 200 students and watch the creative ways in which hackers could utilize your products. We are organizing STEMHacks with the assistance from the founders of MHacks and Pennapps to ensure an event of high class with a wide range of untapped high school potential.

Sponsors will get the most out of STEMHacks when they:

1. Bring company engineers and mentors to the event. By bringing mentors to STEMHacks you allow your company to interact the with the next generation of inventors and give a hands-on experience of your API or other technology. Furthermore it increases your brands recognition.
2. Send company swag. Sending items like laptop stickers, water bottles, t-shirts, pens, etc. acts as an avenue for expanding your company's brand recognition and advertising your product outside of the just the hackathon, overall getting your company more exposure.
3. Monetary sponsorships:
